

**Treble G** is always on the line that that the **Treble Clef** wraps around (line 2)

**Treble G** is always higher (to the right) of **Middle C**. To find it, look for the 3 **black keys** to the right of **Middle C** and it's the **white key** to the left of the middle **black key**.

To check, use your musical alphabet: "C, D, E, F, G" (remember, the music alphabet repeats from A to G, and after G it goes back to A).
