

We use our fingers to play the piano, and each finger has its own number:

Because your hands are mirror images of each other it might be confusing to remember which finger is which number, so look at what number each pair is: thumbs are 1's, pointers are 2's, middles are 3's, rings are 4's, and pinkys are 5's!

On the hands below, write the correct finger number on top of each finger.
Also, write "LH" inside of the left hand and "RH" inside of the right hand.

When you're done, color in pairs of finger numbers the same color!
